- **Submissions on Review:** This section shows the details of the review process.

2) **This field is for detail description of manuscripts per submission status.** When you click the each mane, details of will be shown on the bottom of the same page.

3) **Author Resources menu:** In this menu, you can check for email from JKPS and download the guideline documents for manuscript submission.

■ Submit New Manuscript

Step 1. Select Submission Method.

JOURNAL OF
THE KOREAN PHYSICAL SOCIETY

ISSN(Print) 0374-4884
ISSN(Online) 1976-8524

Start Manuscript File Management Authors Review & Submit

To proceed with the submission, you need to check the following.
Manuscripts that do not meet the guidelines mentioned below will be immediately returned to the author.

Submission Method * Regular Issue Special Issue

Step 2. See the requirements on check list

Before you submit article please check whether you fulfilled all of the necessary requirements

Start Manuscript File Management Authors Review & Submit

To proceed with the submission, you need to check the following.
Manuscripts that do not meet the guidelines mentioned below will be immediately returned to the author.

Submission Method * Regular Issue Special Issue

Start

1. General Items

- 1-1. Manuscript followed the code of ethics established by this journal.
- 1-2. Original manuscript is prepared in order of cover page, title page and main text.
- 1-3. Typos, terminologies and sentences of the manuscript are fully checked.
- 1-4. Cover page contains title of manuscript, list of all authors (name/affiliation/address. For a corresponding author, add e-mail address/telephone number/fax number), type of paper (See Article 1 of the Instruction to Authors for Publication in Journal of the Korean Physical Society), related field in physics (Ex: nuclear physics), preferred referees.

2. Cover and title page

- 2-1. Title page contains title of manuscript, name/affiliation/address of all authors, abstract, PACS numbers, keywords, e-mail address of a corresponding author.
- 2-2. Length of abstract is within 600 ~ 1,000 characters including spaces.
- 2-3. The abstract and keyword should not contain displayed mathematical equations, footnotes, references, graphics, or tabular material.
- 2-4. Main text is prepared in order of introduction, main body, results and discussion, conclusion, acknowledgements, references, captions of table (figure, photo), and tables (figures, photos).

3. Main text

- 3-1. Main title of main body is experiment (theory) for experimental (theoretical) manuscript. (Small titles can used, if necessary.)
- 3-2. Every articles in references are cited in the main text.

4. References (See Article 5 of the Instruction to Authors.)

- 4-1. Abbreviated titles of journals are correct.
- 4-2. When web sites are cited, citing dates are written in references.
- 4-3. When number of authors is larger than 6, names of five authors plus "et al." are used.
- 4-4. All figures (photos) are submitted in electronic publishable formats (i.e., png, pdf, with resolution higher than 300 dpi).

5. Tables, figures and photos (See Article 6 of the Instruction to Authors.)

- 5-1. Considering reduction of size in final version, sizes of titles, legends and symbols are reasonably large.
- 5-2. All units and symbols are written in romans and in italics, respectively.

See All the Check Lists

Author submission requirement form

In case the manuscript is accepted for publication at Journal of the Korean Physical Society, the authors convey copyright ownership of the current manuscript to the The Korean Physical Society, copyright owner of Journal of the Korean Physical Society, and the authors will be responsible for the contents of the manuscript. Authors should confirm that the manuscript or part of it has not been previously published and will not be published via other journals if accepted by Journal of the Korean Physical Society.

Save & Continue

Step 3. Fill in the basic manuscript information

In case you need to submit the article with fast track please choose "Rapid submission"

Title *	Nuclei Correlated with the Arrival Directions of Ultra-High Energy Cosmic Rays We study the correlation between active galactic nuclei (AGNs) and the arrival directions of ultra-high-energy cosmic rays (UHECRs) using the nearest source angular distance distribution. Based on this, we search the subsets of AGNs which improve the correlation. For these subsets, we investigate the features of AGNs in the subsets distinguished from the whole set of AGNs in the distance

■ arxiv.org:id

If your article already has id on arxiv.org you can deposit the data with the arxiv.org id information

Example of arxiv id)

arXiv: YYYY.number

arXiv: 1501.00001 or arXiv:0706.0001

Please note that the journal may not use your suggestions, but your help is appreciated and may speed up the selection of appropriate reviewers.

Suggesting reviewer(s) is Recommend for Submission.

Please note that the journal may not use your suggestions, but your help is appreciated and may speed up the selection of appropriate reviewers.

Step 5. File upload

1. Upload as many as needed for your manuscript and make sure to select the file item from the drop-down menu.
2. Enter a description in the text box.
3. Click browse.
4. In the opened window, select the file on your computer (Manuscript, Figure, Table) and click open.
5. Click attach this file (Upload files).

These files will be combined into a single PDF document for the review process. You must ensure that these files are numbered in the order in which they should appear in the PDF. If you have made a mistake, delete the file(s) and reupload. Make sure to click on "Upload files" to successfully upload your files. When all Items have been attached, click Save & Continue at the bottom of the page.

Supplemental Files

You may provide any supplemental data that are not part of the printed paper but may be useful for evaluation of your manuscript by reviewers and editors

Title *	Detection of forbidden line components of lithium-like carbon in stellar spectra
PACS No. *	02.10.De, 05.10.Ln
Abstract *	We report the first identification of forbidden line components from an element heavier than helium in the spectrum of astrophysical plasmas. As yet, these components were identified only in laboratory plasmas and not in astrophysical objects. Forbidden components are well known for neutral helium lines in hot stars, particularly in helium-rich post-AGB stars and white dwarfs. We discovered that two hitherto unidentified lines in the ultraviolet spectra of hot hydrogen-deficient (pre-) white dwarfs can be identified as forbidden line components of triply ionized carbon (C ⁴⁺). The forbidden components (3p-4f and 3d-4d) appear in the blue and red wings of the strong, Stark broadened 3p-4d and 3d-4f lines at 1108,AA and 1169,AA, respectively. They are visible over a wide effective temperature range (\$60,000-200,000\$,K) in helium-rich (DD) white dwarfs and PG,1159 stars that have strongly oversolar carbon abundances.
